

Ullrich Aluminium

CASE STUDY: SILVER AWARD – HOUSE OF THE YEAR

Location: Ashburton

Cladding: Shadoline / Traditional

The use of the Shadoline and Traditional Ulltraclad boards worked well with the modern raking lines of the house.

The contrast between the stone and the aluminium cladding broke the horizontal lines of the traditional board well – allowing both claddings to share the limelight.

Construction time was minimised due to the simplicity of the Ulltraclad system – also the universal corner, jamb and soffit mouldings supplied with the system allowed a smooth transition between cladding profiles.
